AccessCenter®

AUTOMATED DISPENSING CABINETS: FACTS

NETWORK

MEDICATION

SECURITY

LOCATION

PHARMACY

STORAGE

Security & Tracking

All medications and supplies are in a controlled, locked, and credential managed environment.

Convenient Access

With localized placement, the AccessCenter allows for quick and easy access to medications 24/7.

Use & Charge

AccessCenter keeps track of what medications have been retrieved for each patient and sends the information back to the HIS.

Reductions

The implementation of an ADC can help reduce medication stock levels by more than 60% and help to reduce medication administration time by over 55%.

"HIS" Integration

AccessCenter fully integrates with your facility's HIS system.

Pharmacy Control

Pharmacy staff has visibility to view and control inventory in the AccessCenter cabinets from the console in the pharmacy.

Drives Efficiency

Reporting functions allow the pharmacy to determine par levels of each medication based on usage, helping to reduce capital tied up in inventory. Additionally the AccessCenter monitors expiration dates helping to prevent the waste of expired medications.

Testimonials

"Adopting the TouchPoint Medical ADC products in our new hospital was a huge step forward. It provides faster access to medications for our nurses as well as a safety net that improves the quality of care."

"The TouchPoint Medical ADC helped us improve patient care by reducing the risk of medication errors and offering nurses immediate access to medications when needed after hours. In particular, our nurses really like the features that address safety issues with sound-alike and look-alike medications. There are also some very helpful reports generated by the system."

FEATURES

DRAWER OPTIONS

Three drawer types to meet security and capacity needs.

MODULAR OPTIONS

Choice of two cabinet depths and multiple door configurations for space flexibility.

ANTIMICROBIAL PROTECTION

MICROBAN® antimicrobial infused surfaces.

TIMELY PROCESS

We manage the quoting, delivery, and install process around your time needs.

SINGLE DRUG CONTROL

Unique secure POD drawer system.

CAPACITY

From 200 to 800 medication locations in a single cabinet.

POD DRAWER SYSTEM

- Single item control with single, double, and triple PODS
- Full Depth Drawer: Up to 6 single PODS
- Compact Depth Drawer: Up to 4 single PODS

Secure Supply Storage

Provides configurable space for items that don't fit in drawers. Assorted size bins are supplied with each supply storage configuration.

LINEAR DRAWER SYSTEM

- Single and double width linear drawers
- Full Depth Drawer: Up to 10 line items
- Compact Depth Drawer: Up to 7 line items

MATRIX DRAWER SYSTEM

- Matrix drawers in single, double, and triple depths
- Full Depth Drawer: Up to 80 line items
- Compact Depth Drawer: Up to 56 line items

*Blue bins pictured are for photography purposes only, AccessCenter is provided with clear bins.

Overbridge

Metal overbridge provides space for mounting your devices and accessories. Base units come with standard height and can be upgraded to full height. Optional on all auxiliary units.

Full Height
*optional

Standard
Height

Each tier and drawer type are configured for your exact needs to improve efficiency and maximize space.

SERVICE & SUPPORT

DESIGN & LAYOUT

Your experienced account executive will help design a system configuration to fit your medication and workflow needs.

INSTALLATION & TRAINING

The TouchPoint Medical project management team will be there every step of the way during set-up, install, and training.

TECHNICAL SUPPORT

TouchPoint Medical in-house 24/7 global phone support.

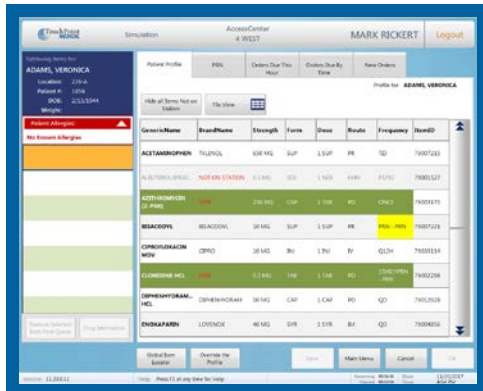

UPGRADE OPTIONS

Affordable options that allow you to upgrade as needs change.

WARRANTY

5 year standard warranty on every unit.

SOFTWARE

Patient Profile Screen

Straightforward screen with all of the individual patient information linked through the HIS.

Inventory Configuration

Quickly and easily manage inventory for all AccessCenter units in your facility.

REQUIREMENTS

Data Requirements: Standard RJ 45 network receptacle
Category 5 cabling - 8 wire, 4 pair

Power Requirements: 120 volt AC minimum 10 amp receptacle.
Configurable for 230 volt AC, minimum 5 amp service, use ICE-320 type C13 cord set.

BTU Output

Unit State - Unit on at idle state power
AC Voltage (V) - 121.8
AC Current (A) - 0.52
S (VA) - 63.336
PF - 0.49
P (Watts) - 31.03

Specifications

Steady State Power - 31W
Heat Evolved - Approximately 106 BTU/hour

Compliance

The AccessCenter System is certified to the following product safety standards:

CSA Marked per the following standards

- UL Std. No. 61010-1 (3rd Edition)
- CAN/CSA-C22.2 No. 61010-1-12

Cumple con FCC 47 CFR Parte 15, Subparte B e Industry Canada ICES-003 Publicación 5

Complies with FCC 47 CFR Part 15 Subpart B, and Industry Canada ICES-003 Issue 5

IECEE CB Scheme Certified for IEC 61010-1:2010 (3rd Edition)

CE Marked as our declaration that the AccessCenter System conforms with health, safety, and environmental protection standards for products sold within the European Economic Area.

ACCESSORIES

Remote Lock
Add access control to a non
AccessCenter cabinet.

*Remote Lock with
Temperature Monitoring*
External refrigerator access control
lock with temperature sensor
integrated with AccessCenter.

External Return Bin
Manage returned medications with the
external return bin that can be mounted to
the overbridge.

Return Drawer
Integrated return drawer within
the drawer system providing
more security around the return
process. Available in single or
double width.

Overbridge
Increase storage space for all units.
Available in full height and standard
height.

Barcode Scanner
Increase security and safety
for inventory tracking

Bulk Storage Bins
Available in multiple sizes for supply
locations.

SECURE MEDICATION DELIVERY SYSTEM FROM THE ACCESSCENTER TO THE PATIENTS BEDSIDE

1

Medications are removed in sequence from med-specific drawers at the AccessCenter

2

Medications are placed in patient specific assigned bins in the RxMD mobile medication cart

3

Medications are delivered safely and securely to the patient bedside and the transaction is recorded via a barcode scan and input on the RxMD computer
