

Mounts for Nihon Kohden Life Scope® G7

Create space at the bedside with the most adjustable patient monitor arms in healthcare. The patented AccessMount 180 patient monitor mount provides a full 16" of height adjustment for easy clinician access in a smaller package that folds flush against the wall when not in use. The AccessMount 500 mount is a compact fixed height pivoting arm. The arms that support the Nihon Kohden Life Scope® G7 patient monitor feature a VESA-standard mounting plate to attach to the back of the medical device. These medical grade solutions are durable and cost-effective. Because all our mounting solutions are machined from aluminum in the USA, a wide variety of configurations can be quickly accommodated. The full range of monitor adapter plates, handles, cable management hooks and down posts will enhance this Nihon Kohden patient monitor model.

- Multiple accessories—adapter plates, handles, cable management hooks, and down posts—are available to further optimize the monitor setup
- The AccessMount 180 ICW folds flush against the wall for space-saving storage
- The AccessMount 500 ICW is compact, fixed in height, and has a pivoting arm design
