

Mounts for GE CARESCAPE™ B650

Make bedside care more comfortable for your staff and patients by opening more space with healthcare's most adjustable patient monitor mounts. The patented AccessMount 180 ICW patient monitor mount provides a full 16 inches of height adjustment for easy clinician access in a smaller package that folds flush against the wall when not in use. The AccessMount 500 ICW is a compact fixed height pivoting arm. These arms are completed with a mounting bracket which features a slide-in mounting plate that accepts all GE monitors.

- Medical-grade design delivers long-lasting durability and cost efficiency.
- Accessory options—monitor adapter plates, handles, cable management hooks, and down posts—further enhance GE monitor setups.
- Designed to improve clinician access and streamline bedside workflow.
