AccessMount 500i ICW: Open Your Workspace While Enhancing User Comfort and Patient Care

The **AccessMount 500i ICW** is built for accessibility and space efficiency, helping to create a more streamlined, clutter-free care environment. By freeing up floor and counter space, it improves workflow and maintains a clear line of sight between clinician and patient. Once positioned, the arm locks securely for stable, consistent use. Designed for flexibility, it allows healthcare and dental professionals to adjust monitors to the ideal height and angle, supporting visibility and ergonomic comfort during exams and procedures.

- Ideal for healthcare and dental environments focused on space efficiency and ergonomics
- Offers a wide range of tilt, pan, and swivel to reduce eye, neck, and back strain
- Optional extension pipes available in multiple lengths

Features

- Improves patient care by maintaining a clear line of sight between clinician and patient
- Sleek design frees up valuable workspace and streamlines workflow
- Securely locks into place for safe and stable monitor positioning
- Enables monitors or screens to be positioned at optimal angles for best viewing during patient care
- Internal cable management for a neat appearance and simplified cleaning
- Customizable extension pipe length to best meet your specific needs
