

medDispense® C series Automated Dispensing Cabinets

The medDispense® C series automated dispensing cabinets deliver maximum flexibility in a single cabinet - from a single item to bulk supply storage. Easily expand your storage capacity further by combining the C series with other medDispense series cabinets.

- Featuring a versatile drawer system, our offering includes lidded pockets as well as single wide linear, double wide linear, and matrix drawers (available in single, double and triple depths).
- High capacity bulk storage allows users to store up to 1,400 items in one cabinet with credentialed access.
- Hold from 84 items up to 600 items in 12 to 60 drawers depending on the configuration.
- Powered by medLogic™ to deliver increased efficiency and flexibility for your team.
- Antimicrobial materials are used throughout, and all high-touch surfaces areas are infused with antimicrobial properties.

Features

- The medDispense® C series automated dispensing cabinets can integrate with F and V series medDispense® automated dispensing cabinets.
- Powered by our latest dispensing software, medLogic™, the medDispense® C series automated dispensing cabinets provide customizable capacity with both single item control and bulk storage capabilities, all in one cabinet.
- Combine with our medGuard™ software module for secure controlled substance storage and closed-loop medication restocking.
- Linear, matrix and lidded pocket drawer options to choose from based on security level and item size.
- Ability to easily combine bulk items with bins, and multiple drawer options in one cabinet.
- Our smallest unit fits on a countertop for areas with lower medication capacity needs.
- On the auxiliary units choose from clear front or steel supply doors.
