Single Monitor Workstation on Wheels

AccessPoint™ workstations on wheels provide an ergonomic solution for caregivers, a flexible technology platform for IT, and a reliable long-term equipment investment for healthcare facilities.

- Raise, lower, tilt, swivel, and rotate the monitor to find the ideal viewing angle.
- Keep caregivers, patients and equipment safe with enhanced visibility while traveling room to room.
- Streamline your workflow and adapt quickly using a range of accessories to fit your needs and application.
- Allow nurses to work in comfort and relax throughout the day with built-in ergonomic features.
- Reduce maintenance costs with interchangeable components.
- Multiple accessories available, contact us for details.
