AccessPoint Secure™ Medication Delivery Workstation

The AccessPoint Secure™ medication delivery cart provides clinicians with an ergonomic and compliant solution for transporting medications securely to the bedside.

- Increase accuracy of medication administration with individually locking, patient-specific drawers.
- Access patient data at bedside.
- Scan patient barcodes during medication administration to stay BCMA compliant.
- Meet budgetary needs with flexibility in software-based locking systems, PC, battery chemistries, peripherals, and more.
- Add mounted accessories to enhance user storage of needed items and streamline workflow.
- Multiple accessories available, contact us for details.
