elo-cart Roll Stand for Philips Patient Monitor

The TouchPoint Medical elo-cart effortlessly transports crucial equipment, such as patient monitors, directly to the bedside with the goal of enhancing patient care, streamlining workflows, and enriching the healthcare experience. This adaptable, resilient, and advanced patient monitor roll stand is designed to accommodate the most popular patient monitors manufactured by Phillips.

- Creating an organized environment fosters increased patient engagement. The elo-cart's compact footprint liberates space in device-intensive settings, allowing caregivers to have more direct interaction with patients.
- It is both simple and reliable. Equipped with a stable base and four tracking casters, the maneuverability of patient monitors becomes easy and safe. Additionally, the fully enclosed bin facilitates fast and efficient access to leads and other accessories.
- For service and maintenance, our onsite services include evaluating your area and workflow, providing mockups for your staff to assess, delivering a clean and professional installation, and ensuring continuous maintenance to meet the ongoing needs of your staff.
