

The right dose of performance and value.

The *TouchPoint Medical*[™] *AccessCenter*[®] product portfolio offers the features healthcare facilities need to accurately and efficiently manage medications, while providing value and a strong return on investment. Whether you use a decentralized or centralized medication delivery model, the system fully supports your current medication management process with single-drug control as well as the capacity to increase medication availability, even IV solutions and bulk items. With more configuration options than anyone, the *AccessCenter*[®] portfolio can accommodate each facility's available space and medication storage needs. This ensures each facility gets exactly what it needs, without foregoing necessary features or exceeding the budget.

The *AccessCenter*[®] system is easy-to-use and allows clinicians to quickly pull patient-specific medications to prepare for a medication pass. The *AccessCenter*[®] system is cleaner by design with built-in *MICROBAN*[®] antimicrobial protection, as well as rounded corners that eliminate crevices and tough-to-clean areas.
