STORAGE

"HIS" INTEGRATION
AccessCenter fully integrates with your facility's HIS system.

SECURITY & TRACKING
All medications and supplies are in a controlled, locked, and credential managed environment.

PHARMACY CONTROL
Pharmacy staff has visibility to view and control inventory in the AccessCenter cabinets from the console in the pharmacy.

CONVENIENT ACCESS
With localized placement, the AccessCenter allows for quick and easy access to medications 24/7.

USE & CHARGE
AccessCenter keeps track of what medications have been retrieved for each patient and sends the information back to the HIS.

DRIVES EFFICIENCY
Reporting functions allow the pharmacy to determine par levels of each medication based on usage, helping to reduce capital tied up in inventory. Additionally the AccessCenter monitors expiration dates helping to prevent the waste of expired medications.

REDUCTIONS
The implementation of an ADC can help reduce medication stock levels by more than 60% and help to reduce medication administration time by over 55%.

Testimonials

"Adopting the TouchPoint Medical ADC products in our new hospital was a huge step forward. It provides faster access to medications for our nurses as well as a safety net that improves the quality of care."

"The TouchPoint Medical ADC helped us improve patient care by reducing the risk of medication errors and offering nurses immediate access to medications when needed after hours. In particular, our nurses really like the features that address safety issues with sound-alike and look-alike medications. There are also some very helpful reports generated by the system."

AccessCenter®
Automated Dispensing

FEATURES

DRAWER OPTIONS
Three drawer types to meet security and capacity needs.

MODULAR OPTIONS
Choice of two cabinet depths and multiple door configurations for space flexibility.

ANTIMICROBIAL PROTECTION
MICROBAN® antimicrobial infused surfaces.

TIMELY PROCESS
We manage the quoting, delivery, and install process around your time needs.

### SINGLE DRUG CONTROL
Unique secure POD drawer system.

CAPACITY
From 200 to 800 medication locations in a single cabinet.

Blue bins pictured are for photography purposes only, AccessCenter is provided with clear bins.

POD Drawer System

Single item control with single, double, and triple PODS

Full Depth Drawer:
Up to 6 single PODS

Compact Depth Drawer:
Up to 4 single PODS

Single POD

Double POD

Triple POD

Secure Supply Storage

Provides configurable space for items that don't fit in drawers. Assorted size bins are supplied with each supply storage configuration.

Linear Drawer System

Single and double width linear drawers

Full Depth Drawer:
Up to 10 line items

Compact Depth Drawer:
Up to 7 line items

Movable dividers

Single Width

Double Width

Matrix Drawer System

Matrix drawers in single, double, and triple depths

Full Depth Drawer:
Up to 80 line items

Compact Depth Drawer:
Up to 56 line items

Configurable partitions

Available in single, double or triple depths. *Two single depth drawers shown.*

Blue bins pictured are for photography purposes only, AccessCenter is provided with clear bins.

Overbridge

Metal overbridge provides space for mounting your devices and accessories. Base units come with standard height and can be upgraded to full height. Optional on all auxiliary units.

Full Height
*optional

Standard Height

Each tier and drawer type are configured for your exact needs to improve efficiency and maximize space.

SERVICE & SUPPORT

Design & Layout	Installation & Training	Technical Support	Upgrade Options	Warranty
Your experienced account executive will help design a system configuration to fit your medication and workflow needs.	The TouchPoint Medical project management team will be there every step of the way during set-up, install, and training.	TouchPoint Medical in-house 24/7 global phone support.	Affordable options that allow you to upgrade as needs change.	5 year standard warranty on every unit.

SOFTWARE

Patient Profile Screen
Straightforward screen with all of the individual patient information linked through the HIS.

Inventory Configuration
Quickly and easily manage inventory for all AccessCenter units in your facility.

REQUIREMENTS

Data Requirements - Standard RJ 45 network receptacle Category 5 cabling - 8 wire, 4 pair

Power Reqirements - 120 volt AC minimum 10 amp receptacle. Configurable for 230 volt AC, minimum 5 amp service, use ICE-320 type C13 cord set.

BTU Output
Unit State - Unit on at idle state power
AC Voltage (V) - 121.8
AC Current (A) - 0.52
S (VA) - 63.336
PF - 0.49
P (Watts) - 31.03

Specifications
Steady State Power - 31W
Heat Evolved - Approximately 106 BTU/hour

Compliance
The AccessCenter System is certified to the following product safety standards:

CSA Marked per the following standards
 - UL Std. No. 61010-1 (3rd Edition)
 - CAN/CSA-C22.2 No. 61010-1-12

Complies with FCC 47 CFR Part 15 Subpart B, and Industry Canada ICES-003 Issue 5
IECEE CB Scheme Certified for IEC 61010-1:2010 (3rd Edition)

CE Marked as our declaration that the AccessCenter System conforms with health, safety, and environmental protection standards for products sold within the European Economic Area.

ACCESSORIES

Remote Lock
Add access control to a non AccessCenter cabinet

Remote Lock with Temperature Monitoring
External refrigerator access control lock with temperature sensor integrated with AccessCenter.

External Return Bin
Manage returned medications with the external return bin that can be mounted to the overbridge.

Return Drawer
Integrated return drawer within the drawer system providing more security around the return process. Available in single or double width.

Overbridge
Increase storage space for all units. Available in full height and standard height.

Receipt Printer
Adds another level to the audit trail.

Barcode Scanner
Increase security and safety for inventory tracking.

Bulk Storage Bins
Available in multiple sizes for supply locations.

AccessRx MD™
Mobile Medication

Secure medication delivery system from the AccessCenter to the Patients Bedside

Patient records match on the AccessCenter and Rx MD via HIS integration
