TouchPoint MEDICAL

medDispense® | Powered by **medLogic™**

Flexibility. Security. Efficiency.

One software platform, countless hardware configurations all working together to give you safer and more efficient automation across your clinical workflow.

BRINGING CARE FORWARD.™

The medDispense® series gives you the control and flexibility to choose the most efficient way to safely store and dispense medications.

KEY BENEFITS

Single Dose Progressive Drawers

Scalable to Expand and Flex with Your Needs

Antimicrobial Protection

NurSync™ Remote Medication Queuing

One Software Platform Across All Hardware

Numerous Secure Storage Configurations

HL7 Interfacing

The Value of medDispense®

Medication security and workflow efficiency are crucial to the medication delivery process. medDispense® provides the widest range of interchangeable dispensing hardware with one software platform.

Flexible Configurations.

All medDispense® cabinets are interchangeable, giving you the most flexibility and security for storing your single dose and bulk items.

Easily Expand Alongside Your Changing Medication Storage Requirements

All medDispense® cabinets work in combination with each other to give you a tailored solution to fit your changing needs.

Eliminate Space Constraint Challenges with an Array of Storage Size Options

The smallest cabinet footprint offering measures (w) 545mm (21.5in) x (h) 2,003mm (78.6in) x (d) 520mm (20.5in).
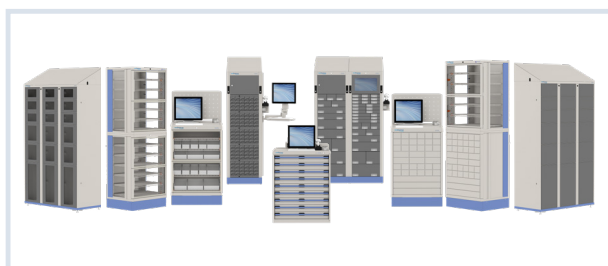

Numerous Hardware Configurations to Meet Your Specific Requirements

Combine high security single dose dispensing alongside bulk storage, powered by medLogic™.

Highly Configurable Software & Hardware

With medLogic™, you can easily configure user settings and security measures alongside hardware compartment layout, giving you maximum system flexibility.

Safe and Secure Dispensing.

Designed to reduce the risk of medication errors and provide secure storage, medDispense® ensures proper safeguards are in place for each item you dispense.
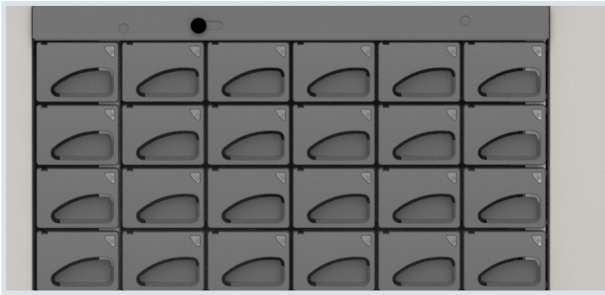

Credentialed Access and Reporting

- All medications and supplies are in a controlled, locked, and credentialed environment.
- The PharmacyCenter™ software module provides visibility to remotely view and control inventory from the pharmacy
- Manage access to specific functions with user level permissions.

High Security Controlled Substance Storage

- Single dose dispensing with progressive steel drawers (complies with UK ECD regulations).
- Optional double signature for removal, waste, return or override.
- Discrepancy tracking and notification.
- The medGuard™ controlled drug management module provides a closed loop.

Planning and Support

- Our Professional Services team works closely with you to ensure medication locations and security levels are optimized for your facility processes.
- System interfaces tailored by our Professional Services team.
- Ongoing technical support throughout the life of your equipment.

Software Safeguards

- medLogic™ powers all medDispense® cabinets with built-in safeguards such as configurable medication search.
- medGuard™ controlled drug inventory management software provides a closed loop restocking process.
- Additional software safegaurds:
    - Allergy alerts, duplicate dose alerts, bar code scanning, look-a-like sound alike alerts, tall man lettering.
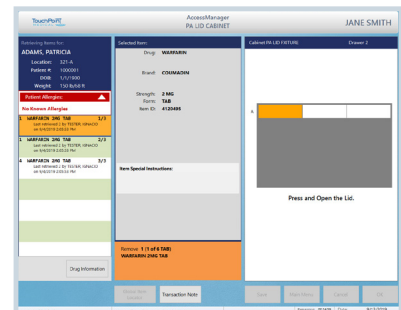

Workflow Efficiency.

With medLogic™ you can work smarter, not harder. Software modules like NurSync™ and PharmacyCenter™ help drive efficiency into your daily workflow.

PharmacyCenter™ station management

medLogic™ item retrieval

Remote Medication Queuing

Maximize time spent with patients and minimize time spent at the ADC with NurSync™ remote medication queuing right from your AccessRx MD™ workstation.

Improved Inventory Level Visibility Across All medDispense® Cabinets

Quickly and easily manage inventory and reduce stock outs across all medDispense® cabinets in your facility with PharmacyCenter™ module.

Intuitive User Interface

Patient information is linked through the HL7 interface. Easy to navigate user interface reduces time spent at the ADC.

AccessRx MD™

medLogic™

A complete continuum of integrated hardware and software that enables safe and efficient medication storage, dispensing and transport.

medLogic™ Benefits.

The medLogic™ software platform delivers increased efficiency and flexibility for your team and a safer environment for your patients.

EFFICIENCY

Single Medication Dispensing Across Multiple Locations
- A single dispense event can span multiple locations across multiple medDispense® cabinets to provide faster dispensing and more time with the patient.

Barcode Stocking
- Faster restocking with the click of a button.
- Eliminate time spent with on screen typing, searching and selecting.

FIFO Stocking Workflow
- medLogic™ will locate and dispense the medication with the oldest restock time, followed by the next oldest to aid with stock rotation.
- Reduce expired medication expense.

SAFETY

Fully Supports the UK NHS ECD Register
- Supports the required ECD workflow and transaction logging.
- Inventory balance report.

On-demand stock report generation by item/medication.
- One Click Restock Report Generation

Configurable Medication Search
- Helps reduce dispensing errors with a configurable four-character medication search.

Lot Number Stocking
- Increase traceability of your medications when you need to know where they are.

FLEXIBILITY

Fractional Dose Stocking and Dispensing
- Dispense, return and waste functions support decimal values.
- Reduce waste of medications.

High Definition 16:9 and Laptop Display
- Now more flexible display options for PharmacyCenter™ and NurSync™ modules.

The medLogic™ interface is user-friendly and easy to operate – saving time and allowing you to focus on patient care.

The system secures and tracks both your medications and supplies while seamlessly integrating with any hospital information system.

medLogic™ modules improve workflow efficiency, safety and visibility so you can save time and focus on delivering exceptional patient care.

Administration

NurSync™

The NurSync™ module enables nurses to reduce time spent at the dispensing cabinet station and increase time spent with patients.

NO WAITING IN LINES AT THE ADC

TYPICAL PROCEDURE

PROCEDURE WITH NURSYNC™

REMOTELY QUEUE PATIENTS FROM YOUR APPROVED WORKSTATION

PRELOAD MEDICATIONS FOR ALL PATIENTS

ELIMINATE MULTIPLE TRIPS TO THE ADC

PATIENT 1   PATIENT 2   PATIENT 3

NurSync™ enables nurses to create medication queues for their patients to help reduce medication retrieval times, create a more efficient workflow and spend more time with patients.

Easy as 1 – 2 – 3

1 Install the NurSync™ module to a computer assigned to the ADC unit such as your AccessPoint™ workstation.

2 Log in to create, manage and delete patient medication queues.

3 When you are ready, go to the medDispense® cabinet and retrieve items from your saved queue.

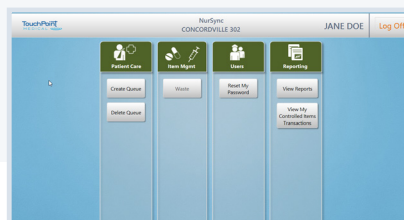

AccessRx MD™   AccessPoint™   AccessRx Exchange™

medGuard™

The medGuard™ module enables facilities to store and track controlled drugs to help ensure closed loop restocking.

medGuard™ main menu

Ensure Controlled Drugs Reach Their Final Specified medDispense® Cabinet

- Helps close the loop of medication delivery and monitors for potential diversion with controlled restocking access and software safeguards.

- Discrepancy tracking ensures the retrieval quantity recorded in medGuard™ matches the quantity restocked in the medDispense® cabinet.

- Optional end of shift counts with medGuard™ ensures additional traceability.

medGuard™ med selection screen

Easily View Controlled Drug Inventory of Your medDispense® Cabinets

- Create controlled drug restock reports for all cabinets.

- Control cabinet visibility by customizing user access.

- Global Item Locater and Global Inventory reports give you instant access to your facility's controlled drug quantities and locations.

- Clear indicators of supply status at each medDispense® cabinet.
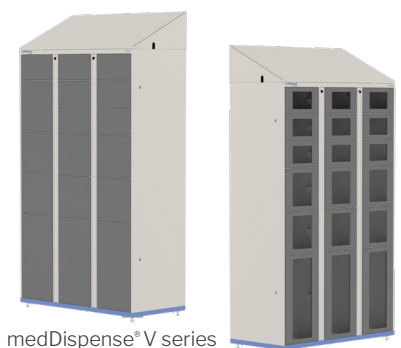

medDispense® V series

▶ Hardware Compatibility

medGuard™ can be installed on any hardware. medDispense® V series is particularly recommended for its configurable storage compartments.
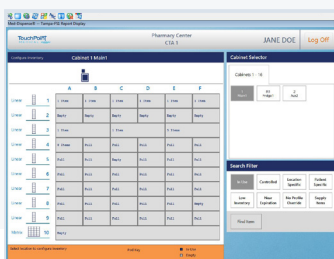

PharmacyCenter™

The PharmacyCenter™ module enables pharmacy staff to manage their medications across multiple medDispense® cabinets from one easy-to-use dashboard and reporting system.

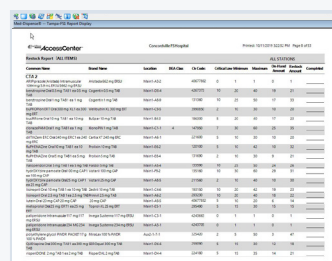

PharmacyCenter™ main menu

PharmacyCenter™ Advantage

✓ Create reports

✓ Configure inventory

✓ View discrepancies

✓ Operator maintenance

✓ Locate critical low items

✓ Configure cabinet settings

Configure Inventory

Restock with Signature Report

Manage Stations

Report Scheduler

The PharmacyCenter™ module lets you manage and maintain your facility's automated dispensing cabinets from any PC.

Inventory management dashboard

Visibility and Management of Your Inventory Across All Cabinets

- Visibility to the specific compartment a mediation is being added to.
- Add, delete or modify a medication for the selected cabinet.
- Verify item numbers, descriptions and set drug class.
- See what medications are low, out of stock, or expiring.
- Manage what medications can be overridden.

Top usage report

Reporting that Matters

- Report on key metrics that matter to your facility, such as: inventory, top usage, transactions, controlled medications, and more.
- Choose from predefined parameters or customize your own.
- Scheduled report routing (print, email and fax).
- On-demand and print preview reports.
- Ad hoc reporting.

Customizable capacity – from single item control to high capacity bulk storage.

medDispense® C series
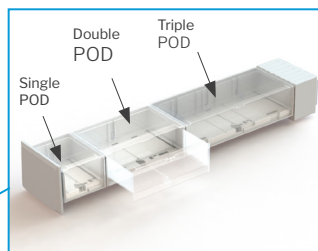

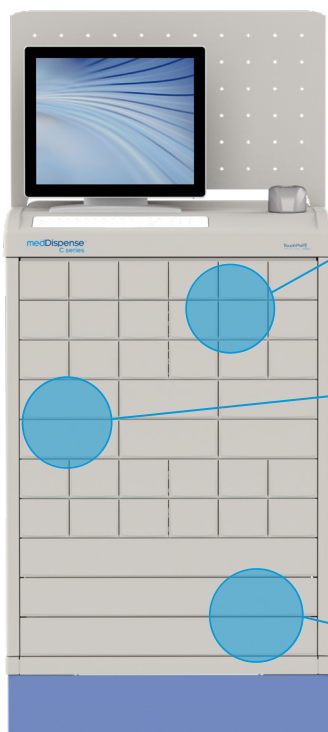

POD Drawer System
- Single item control with single, double, and triple PODS.

Single POD

Double POD

Triple POD
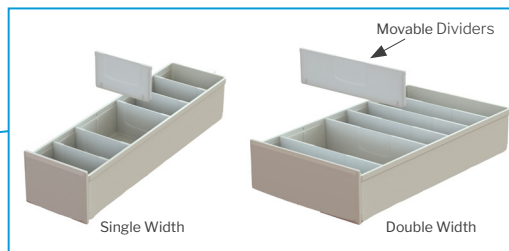

Linear Drawer System
- Single and double width linear drawers.

Movable Dividers

Single Width

Double Width
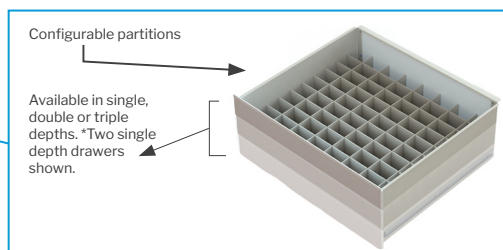

Matrix Drawer System
- Matrix drawers in single, double,and triple depths.

Configurable partitions

Available in single, double or triple depths. *Two single depth drawers shown.

The medDispense® C series integrates with:

CS series, CT series, F series, L series, M series and V series.

Bulk Storage in a Smaller Frame
- Bulk storage or large items can be securely stored and dispensed.
- Multiple bin options for each item.
- All C series bulk storage areas have lighting preferences for easy item identification.

Combination of Single Item and Bulk Item Control
- Combines multiple drawer configurations, including single item control with bulk storage.
- Lighted bulk storage area.

medDispense® Accessories
- Storage bins come in multiple sizes. See page 34 for a complete list.

The Smallest of the medDispense® Cabinets
- Ideal for areas with lower capacity needs.
- 112 maximum unit capacity.
- The compact countertop unit fits virtually anywhere.

Antimicrobial Protection

Add additional capacity to secure bulk supply or other large items.

medDispense®
CS series

Secure Your Large or Bulk Supply Items

- Configurable bins and locations to fit an array of bulk items.

- All CS series bulk storage areas have lighting preferences for easy identification.

- Steel door options add an additional level of privacy and security.

- Full or compact depth sizes.

- Combine with the medGuard™ software for secure controlled substance storage.

CS series with clear front

CS series with steel front

Multiple Sizes to Flex with Your Storage Needs

- The half sized CS series cabinets provide security and capacity in a range of sizes.
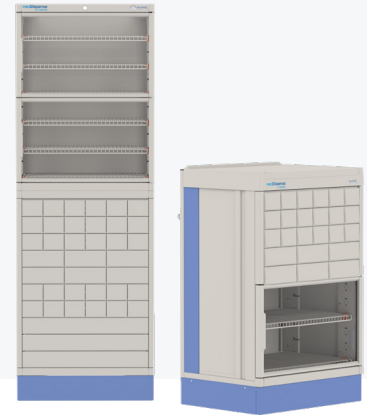

- Full or compact depth sizes

Half height CS series with clear front

The medDispense® CS series integrates with:

C series, F series, L series and M series.

Antimicrobial Protection

Expand your capacity while combining the security of single item control and bulk supply storage.

medDispense® CT series

Combines Single Item control with Bulk Storage

- Store up to 1,400 items in one tower.
- Multiple depths to fit your facility needs.
- Credentialed access for bulk items.

Drawer System
- Utilizes the same drawer options as the C series.
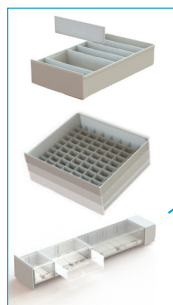

Configurable Drawers and Shelving

- Configurable drawers just like the C series, with options for linear, matrix, and POD storage.
- All CT series bulk storage areas have lighting preferences for easy item identification.

Countertop Sized Dispensing Expansion

- Ideal for small countertop locations that need additional capacity.
- 112 maximum unit capacity.

High Capacity Expansion in a Smaller Footprint

- Dispense up to 800 items per unit.
- Choice of full or compact depth.
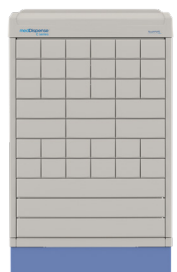

The medDispense® CT series integrates with:
C series, F series, L series and M series.

Antimicrobial Protection

The highest level of security with single dose dispensing to ensure access to only the quantity requested.

medDispense® F series
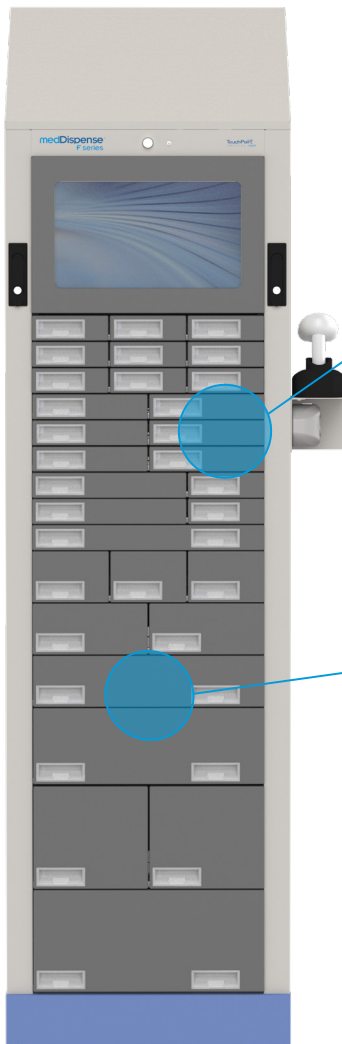

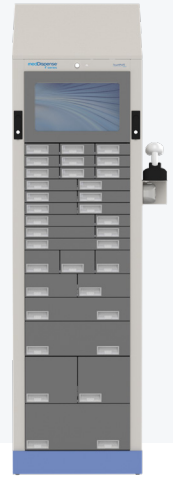

Highest Security Medication Dispensing

- Single dose steel compartments with up to 12 progressive drawer compartments to ensure access only to the medication needed.
- Steel construction fully supports the NHS Controlled Drug requirements.

Efficient Dispensing Technology

- The pick-to-light technology makes it easier and faster to locate and dispense the selected items.

Highly Configurable and Expandable

- Up to 15 different drawer sizes to accommodate the desired security level and item size.
- Supports three stocking modes: single, mixed and linear.

The medDispense® F series integrates with:

C series, CS series, CT series, L series, M series and V series.

Antimicrobial Protection

Single item compartment control accommodates a wide range of medication sizes that require higher security than open compartments.

medDispense®
L series
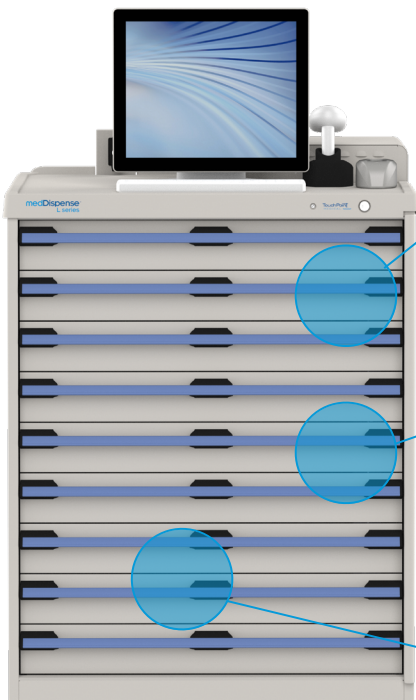

Secure Single Item Access
- Compartments are robust and incorporate high strength locks that cannot be forced open.
- Items held within the compartments are hidden from view to increase security.
- Steel construction fully supports the NHS Controlled Drug requirements.

High Capacity Configurations
- Two different drawer sizes (100mm and 150mm deep) to accommodate a range of medications.
- Offers larger compartment size options compared to the C series PODs.
- Nine different compartment sizes to meet your needs.

Easy to locate with Pick-to-Light Guidance Technology
- Drive quick and efficient dispensing with lights that guide you to the drawer and compartment.

The medDispense® L series integrates with:
C series, CS series, CT series, F series, M series and V series.

Antimicrobial Protection

Delivers high capacity and high security in a small footprint.

medDispense®
M series

Adjustable Monitor Arm
- Left or right mounting.
- Vertical height adjustment.
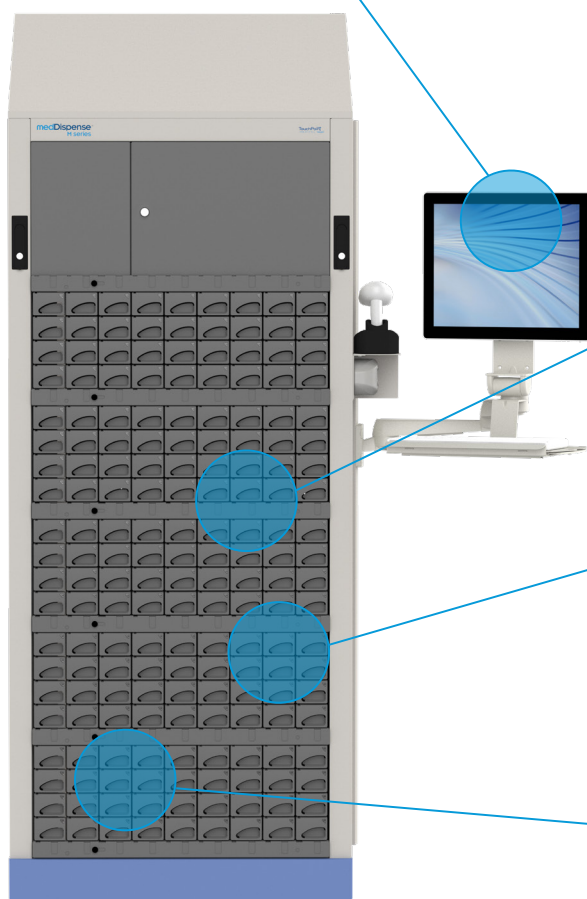

High Security Medication Dispensing
- Single dose dispensing with up to 12 locations within a progressive drawer.
- "Easy Scoop" compartment design ensures smooth retrieval of contents.

Easy to Reconfigure and Expand
- Up to five different drawer sizes to accommodate the desired security level and item size.

Efficient Dispensing Technology
- The pick-to-light technology makes it easier and faster to locate and dispense the selected items.

The medDispense® M series integrates with:
C series, CS series, CT series, F series, L series and V series.

Antimicrobial Protection

Storage and traceability of bulk medications and supplies.

medDispense®
V series
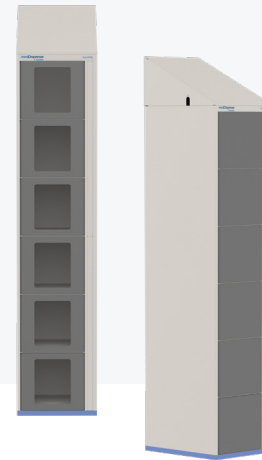

Configurable Lockers
- Three door sizes to choose from.
- Items are easily located by pop open doors or guiding lights for quick and intuitive access.

Secure Easy Identification
- Each individual locker has it's own lighting capability, allowing full visibility of products.

Ideal for Central Pharmacy Controlled Substance Storage

Combined with the medGuard™ module, the V series provides a closed loop solution for your controlled drug management.

Security and Privacy
- Steel frame construction.
- Clear front door or steel door options.

Large Volume Capacity
- Nine secure doors per cabinet.

The medDispense® V series integrates with:
C series, F series, L series and M series.

Antimicrobial Protection
