KEY BENEFITS

medGuard™ Controlled Substance Inventory Management

Scalable to Expand and Flex with Your Needs

MICROBAN. Antimicrobial Protection

NurSync™ Remote Medication Queuing

One Software Platform Across All Hardware

Numerous Secure Storage Configurations

HL7 Interfacing

The Value of medDispense®

Medication security and workflow efficiency are crucial to the medication delivery process. medDispense® provides the widest range of interchangeable dispensing hardware, powered by medLogic™ a fully-integrated software platform.

Flexible Configurations.

All medDispense® cabinets are interchangeable, giving you the most flexibility and security for storing single dose and bulk items.
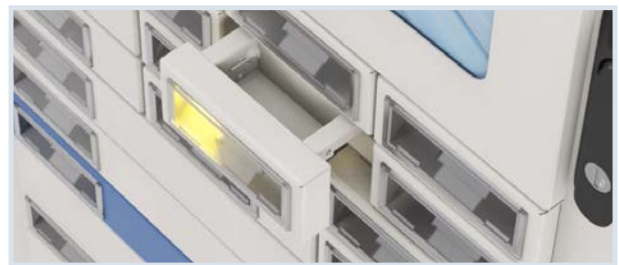

Easily Expand to Meet Your Changing Medication Storage Requirements

All medDispense® cabinets work together to meet both current and future needs.

Eliminate Space Constraint Challenges with an Array of Storage Size Options

Storage footprints available ranging from a small desktop unit to a large cabinet for bulk storage.

A Wide Range of Configurations to Meet Your Capacity and Workflow Needs

Combine high security single dose dispensing alongside bulk storage. All medDispense equipment can be integrated and is powered by medLogic™.

Highly Configurable Software & Hardware

With medLogic™, you can easily configure user settings and security measures alongside hardware compartment layouts, offering you maximum system flexibility.

Safe and Secure Dispensing.

Designed to reduce the risk of medication errors and provide secure storage, medDispense® ensures proper safeguards are in place for each item you dispense.

Credentialed Access and Reporting

- All medications and supplies stored in a controlled, locked, and credentialed environment.
- The PharmacyCenter™ software module provides visibility to remotely view and control inventory from the pharmacy.
- Control access to specific functions with user level permissions and role-based profiles.

High Security Controlled Substance Storage

- Single dose dispensing with progressive steel drawers (complies with UK ECD regulations).
- Optional witness signature for removal, waste, return or override.
- Discrepancy tracking and notification.
- The medGuard™ controlled substance management module provides system-wide visibility and management of controlled substance inventory.

Planning and Support

- Our Professional Services team works closely with you to ensure medication locations and security levels are optimized for your facility processes.
- System interfaces tailored by our Professional Services integrators.
- Remote technical support throughout the life of your equipment.

Software Safeguards

- medLogic™ powers all medDispense® cabinets with built-in safeguards such as precounts, patient medication profiles, receipt and label printing and configurable patient and medication searching.
- medGuard™ controlled substance inventory management software provides a closed loop restocking process.
- Additional software safeguards:
  - Allergy alerts, duplicate dose alerts, bar code scanning, look-a-like sound alike alerts, tall man lettering.
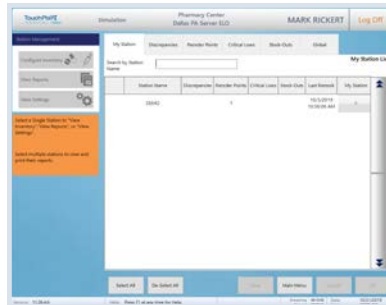

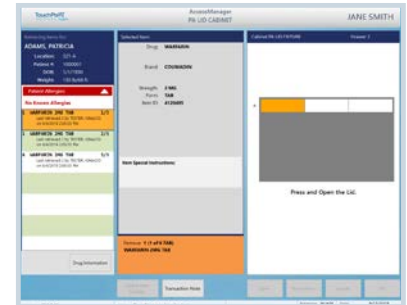

Workflow Efficiency.

With medLogic™ nurses and pharmacy staff can work smarter, not harder. Software modules such as NurSync™ and PharmacyCenter™ help drive efficiency into your daily workflow.
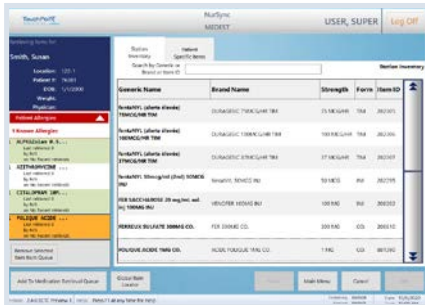

NurSync™ create a queue

PharmacyCenter™ station management

medLogic™ item retrieval

Remote Medication Queuing

Maximize time spent with patients and minimize time spent at the ADC with NurSync™ remote medication queuing right from your AccessRx MD™ cart or networked workstation.

Improved Inventory Level Visibility Across All medDispense® Cabinets

Quickly and easily manage inventory and reduce stock outs across all medDispense® cabinets in your facility with PharmacyCenter™.

Intuitive User Interface

Patient demographics, medication profile and formulary managed via custom HL7 interface. Easy to navigate user interface reduces time spent at the ADC.

AccessRx MD™

medLogic™

A complete continuum of integrated hardware and software that enables safe and efficient medication storage, dispensing and transport.

medLogic™ Benefits.

The medLogic™ software platform delivers increased efficiency and flexibility for your team and a safe environment for your patients.

EFFICIENCY

Support for Multi-item Kits
- Pharmacy can create pre-defined, multi-item kits for specific modalities, procedures or protocols.

Barcode Stocking
- Stock cabinets quickly and efficiently using the integrated wireless barcode scanner.
- Eliminate time spent with on screen typing, searching and selecting.

FIFO Stocking Workflow
- medLogic™ items are dispensed first-in, first-out to optimize inventory lifecycle.
- Reduce expired medication expense.

SAFETY

Supports the UK NHS ECD Register
- Supports required requisition and dispense workflow and transaction logging.
- Inventory balance report.

On-demand Stock Report Generation by Item/Medication.
- One Click Restock Report Generation.

Configurable Medication Search
- Helps reduce dispensing errors with a configurable four-character medication search.

Lot Number Stocking
- Increase traceability of your medications when you need to know where they are.

FLEXIBILITY

Fractional Dose Stocking & Dispensing
- Dispense, return and waste functions support decimal values.
- Reduce waste of medications.

Bulk Item Management
- Flexible charge capture rules for frequently dispensed bulk items.

High Definition and Laptop Display
- Now more flexible display options for PharmacyCenter™ and NurSync™ modules.

The medLogic™ software is user-friendly and easy to operate – saving time and allowing you to focus on patient care.

The system secures and tracks both medications and supplies, while seamlessly integrating with most hospitals information system.

medLogic™ modules improve workflow efficiency, safety and visibility so you can save time and focus on delivering exceptional patient care.

medGuard™

The medGuard™ module enables facilities to store and track controlled substances from a secure, central location.

medGuard™ main menu

Ensure Controlled Substances Reach Their Final Specified medDispense® Cabinet

- Helps close the loop of medication delivery and monitors for potential diversion with controlled restocking access and software safeguards.
- Discrepancy tracking ensures the retrieval quantity recorded in medGuard™ matches the quantity restocked in the medDispense® cabinet.
- Optional end of shift counts with medGuard™ provides additional traceability.
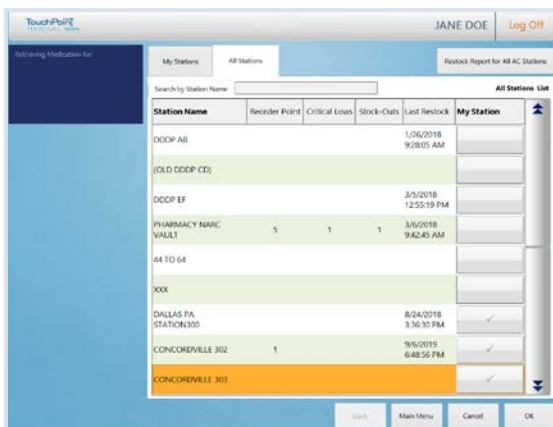

medGuard™ med selection screen

Easily View Controlled Substance Inventory of Your medDispense® Cabinets

- Create controlled substance restock reports for all cabinets.
- Control cabinet visibility by customizing user access.
- Global Item Locator and Global Inventory reports provide you instant access to your facility's controlled substance quantities and locations.
- Clear indicators of supply status at each medDispense® cabinet.

medDispense® V series with clear and steel doors.

Hardware Compatibility:

medGuard™ can be installed on any medDispense® cabinet. medDispense® V series is particularly recommended for its configurable storage compartments.

PharmacyCenter™

The PharmacyCenter™ module gives pharmacy the ability to manage medication across multiple medDispense® cabinets from one easy-to-use dashboard and reporting system.

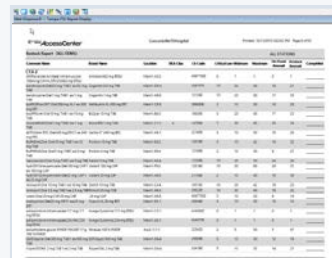

PharmacyCenter™ main menu

PharmacyCenter™ Advantage

✓ Create reports
✓ Configure inventory
✓ View discrepancies
✓ Operator maintenance

✓ Locate critical low items
✓ Identify out of stock items
✓ Configure cabinet settings

Restock with Signature Report

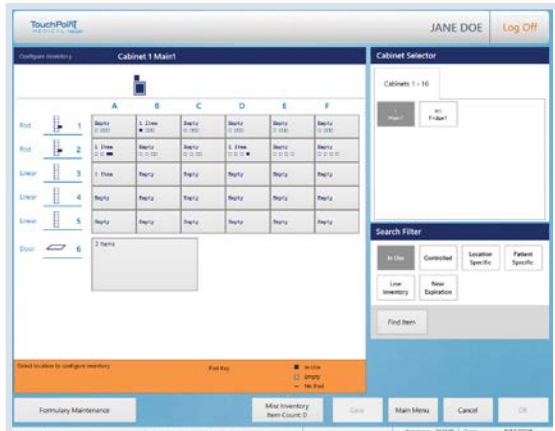

Manage Stations

Report Scheduler

The PharmacyCenter™ module lets you manage and maintain your facility's automated dispensing cabinets from any PC.

Inventory management dashboard

Visibility and Management of Your Inventory Across All Cabinets

- Define specific storage locations for each medication or inventory item.
- Add, delete or modify a medication for the selected cabinet.
- Verify item numbers, descriptions and set drug class.
- Monitor low, out of stock, or expiring medications.
- Manage what medications can be overridden.
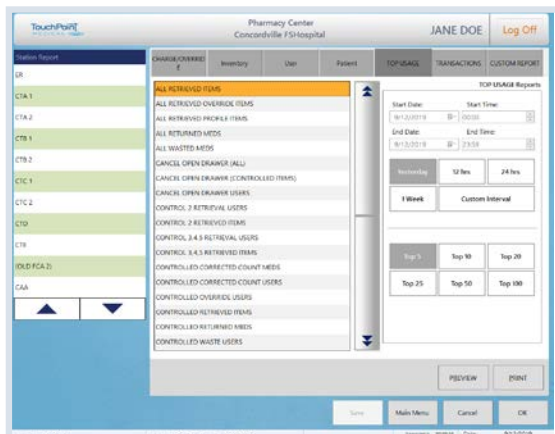

Top usage report

Reporting that Matters

- Report on key metrics that matter to your facility, such as: inventory, top usage, transactions, controlled medications, and more.
- Choose from predefined parameters or customize your own.
- Schedule and route reports (print, email and fax).
- Ad hoc custom reporting.

Single item control accommodates a wide range of medication sizes that require higher safety and security than open compartments.

medDispense®
L series

Secure Single Line Item Access

- Compartments are robust and incorporate high strength locks.
- Items held within the compartments are hidden to increase security and protect from light.
- Steel construction supports the NHS Controlled Substance requirements.

Efficient Dispensing Technology

- The pick-to-light technology makes it easier and faster to locate and dispense the selected items.
- Lights guide you to the correct:
  - Cabinet
  - Drawer
  - Compartment

The medDispense® L series integrates with:

C series, CS series, CT series, F series, M series and V series.

High Capacity Configurations

- Single line item dispense. Nine different lid compartment sizes.

- Matrix drawer with four different depths (75mm, 100mm, 150mm and 200mm) to accommodate a range of medications.

TouchPoint MEDICAL

medDispense® Accessories.

Equipment changes over time and our line of accessories can be added or removed to fit your application needs.

Remote Lock
Add access control for non-medDispense® storage cabinets. Remote Lock Bluetooth option.

Remote Lock with Temperature Monitoring
External refrigerator access control lock with temperature monitoring, integrated with the medLogic® software. Remote Lock Bluetooth options.

External Return Bin
Manage return medications with the external return bin that can be mounted to the overbridge. Available on the L, M, F and C series.
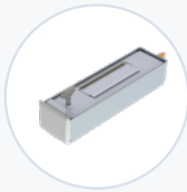

Return Drawer
Integrated return drawer within the drawer system providing more security around the return process. Available on C and CT series cabinets in single or double width.
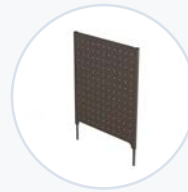

Overbridge
Increase storage space for all units. Available in full height and standard height on the C, CS and CT series.

Barcode Scanner
Enhanced workflow using an integrated, wireless barcode scanner. Available on L, M, F, and C series.
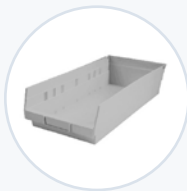

Bulk Storage Bins
Available for C, CS and CT series in multiple sizes for supply locations.

Thermal Printer
Add a thermal printer for patient and dispense specific transaction receipts. Available on L, M, F, and C series.

Label Printer
Add a label printer to print medication and patient specific labels. Available on the L, M, F and C series.

Finger Print Scanner
Secured biometric system access. Comes standard on all medDispense base units.

CE

CSA testing is approved to support global regulatory requirements. Manufactured in ISO certified facilities.

Fast. Responsive. Courteous Service.

We are committed to providing you with consultative and responsive support throughout our partnership together.

DESIGN AND LAYOUT

Your experienced account executive will help design a system configuration that fits your specific medication storage and workflow needs.

INSTALLATION AND TRAINING

The TouchPoint Medical Professional Services team will be there every step of the way during set-up, install, training and deployment.

TECHNICAL SUPPORT

The TouchPoint Medical Technical Support team provides in-house global phone support.

COMPLEMENTARY SOFTWARE UPDATES

Complimentary software enhancements are available and announced to customers as they are released.

WARRANTY

5 year standard warranty on every cabinet.

*Contact your TouchPoint Medical representative to learn more and discuss additional accessories specific to your medication management application. Visit **touchpointmed.com/contact** to get in touch with your local representative.*

AccessRx MD™

AccessRx Secure™

AccessRx Exchange™

Helping to Close the Loop on Medication Administration.

The AccessRx Series of medication delivery carts provides solutions to more securely and efficiently transport and administer medications at the patients' bedside.

KEY BENEFITS

🔒 Individual Locking Bins & Drawers

📷 Supports real-time BCMA

💊 Supports Centralized or Decentralized Medication Fill Workflow

🔄 Exchangeable Medication Cassettes

📍 Secure & Track Patient Medication

🔋 Advanced Li-Nano Technology w/ 5 Year Warranty

Closing the loop of medication delivery between pharmacy and the patient bedside.

AccessRx MD ™

Medication Security & Visibility at the bedside

- Individually locking, patient-specific drawers can be accessed by scanning the patient ID barcode
- Real-time bedside medication administration, barcode patient identification and direct eMAR API access streamlines BCMA process, reduces redundancy and increases accuracy
- Patient drawers automatically assigned using the ADT (Admission/Discharge/Transfer) interface, eliminating time consuming and error-prone manual drawer labeling
- Utilizes the hospital's Active Directory for consistent user authentication
- Configurable drawer display fields allow customization of the user interface
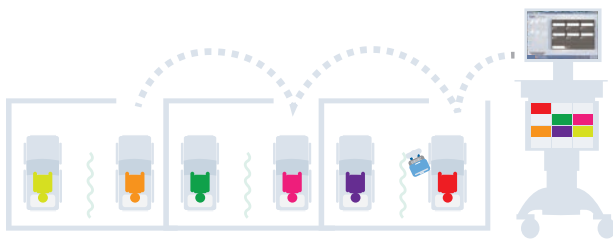

Streamline Your Workflow

- Secures and tracks patient specific medications for up to 12 patients in individually-locking drawers, reducing trips and time spent at the ADC
- ADT and patient orders transmitted via wireless network to the cart to facilitate faster medication delivery
- Reduce trips to and time spent at the automated dispensing cabinet

More Control & Flexibility for Pharmacists across a variety of pharmacy distribution models

- Browser-based AccessManager™ console provides access to reports while allowing for Active Directory-compatible user management, fleet management and system configuration

- Configurable, time-based access controls reduce the risk of medication administration at an incorrect time and aid in pharmacy reconciliation for unused medications

- Optional medications orders interface – Rx MD can act as a patient medication order filler and verify that an order has been administered.

- Secure Pharmacy email alerts for transferred & discharged patients

Scalable & Centralized Software Architecture and Integration

- Multi-Org - scaleable architecture - ability to scale from two bed clinic to multi facility health system

- Ability to set up health system access rights, such as by department

- Enterprise reporting available

- Enterprise multi-facility deployment

- HL7 compliant, ADT interface (patient demographics), and RDE interface (Pharmacy approved orders)

- Configurable interface engine easily communicates with the HIS

- Project management, installation and training by TouchPoint Medical's professional services team

Configure your system to meet your medication and supply requirements.

Driving efficiency & security with your centralized medication distribution.

AccessRx Exchange™

AccessRx Exchange™ Workstation on Wheels

- Restock easily wherever your need. Can easily be filled in the pharmacy and exchanged or directly at the cart.
- Key lock or eLock security options
- Easily retrofit your existing AccessPoint™ workstation on-site with the Exchange Cassette system
- May be added to powered or nonpowered carts
- Works with both manual and electric lift carts

Exchangeable Cassettes

- Restock easily and directly on the mobile workstation or wall mount
- Available in two, three or four tier sizes & multiple bin sizes and supply drawer options
- Load rated up to 2.2kg (5.5lbs) per tier
- Compact footprint fits 600mm x400mm cart or (ISO 3394 modular systems) cabinet

Transfer Carts

- All transfer carts include locking tambour door
- All transfer carts include extended handle
- Lock options include key lock or e-lock
- Single width, front loading option
- Double width, side loading option
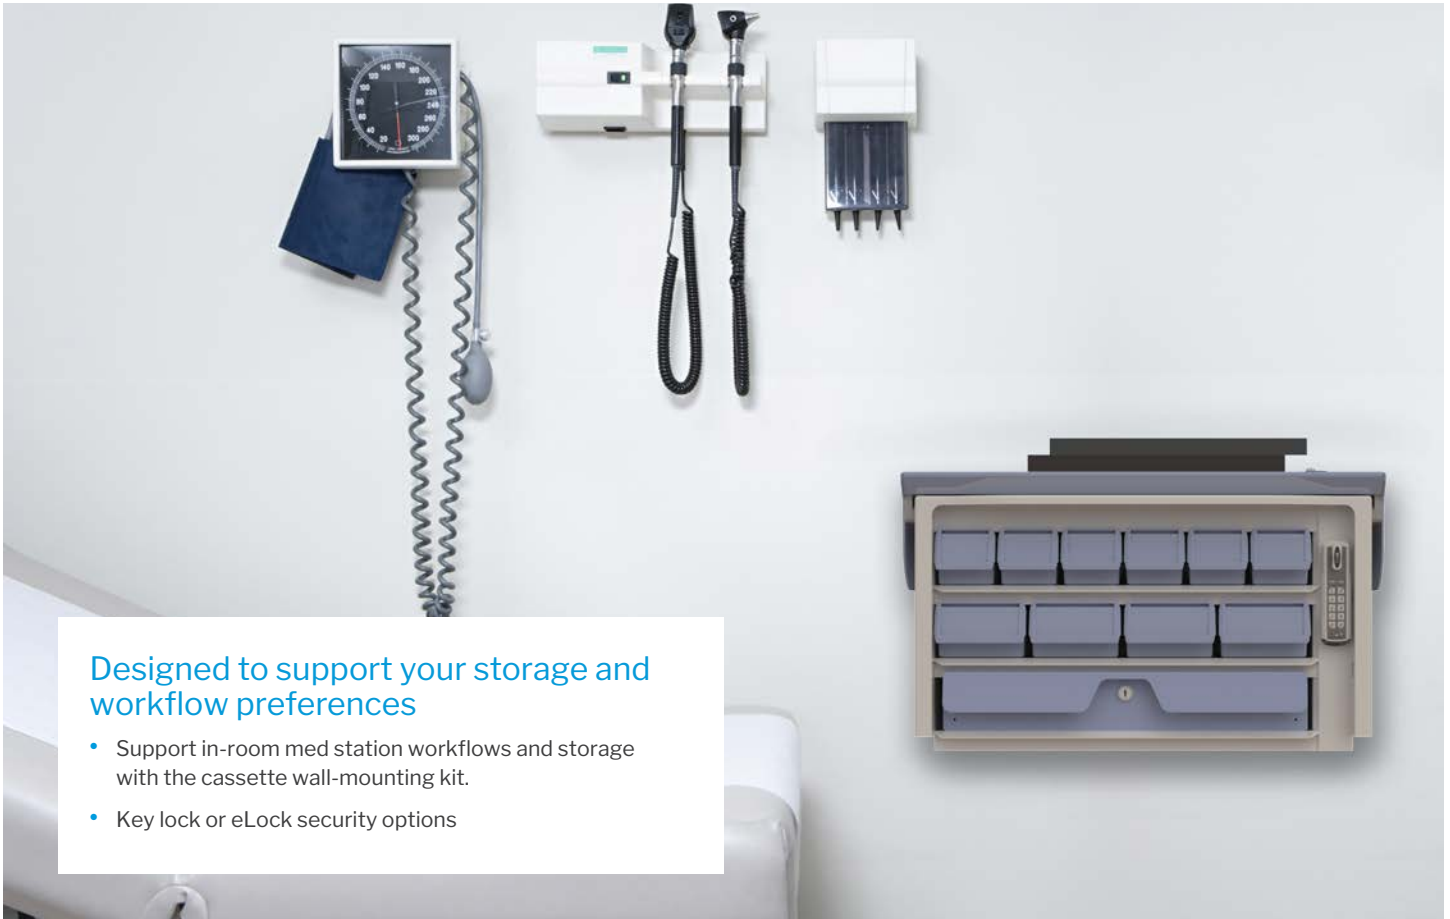

Designed to support your storage and workflow preferences

- Support in-room med station workflows and storage with the cassette wall-mounting kit.
- Key lock or eLock security options

Easily adapt your existing AccessPoint™ fleet with the AccessRx Exchange™ system

- Retrofit your existing workstations on-site with minimal downtime
- May be added to powered or nonpowered carts
- Works with both manual and electric lift carts

Flexible Locking Options

Push Button eLock Features:

- 20 codes per lock: 19 User codes and one Supervisor code; code length is 4-8 digits
- 7500 cycles (extended battery life)
- ADA compliant
- Low battery indicator
- Battery compartment is easily accessible from outside of the cassette

Key Lock Features:

- Removable lock core
- Unique lock/key series for cassette carrier, cassettes, and controlled substance drawer for enhanced security
- Side shuttered lock with symmetrical keying

Store and secure your medications to the bedside.

AccessRx Secure™

Secure your medications throughout your workflow

- Individual locking drawers
- Easy-to-use software
- Storage configurations to secure a variety of medications and controlled substances
- Smoked polycarbonate 4" & 6" drawers
- Aluminum locking storage and controlled substance drawers
- Configurable drawer display fields allow customization of the user interface
- Add AccessRx MD™ software options to existing AccessRx Secure ™carts for a scalable, custom solution

Configure your system to meet your medication and supply requirements.

With a wide offering of sizes and locking options, you can have peace of mind knowing your medications and supplies are securely stored to your requirements.
