The Value of medDispense®

Medication security and workflow efficiency are crucial to the medication delivery process. medDispense® provides the widest range of interchangeable dispensing hardware, powered by medLogic™ a fully-integrated software platform.

medLogic™ software platform

medDispense® cabinets are interchangeable, giving you the most flexibility for storing your medications.

Easily Expand to Meet Your Changing Medication Storage Requirements

- All medDispense® cabinets work together to meet both current and future needs.

Eliminate Space Constraint Challenges with an Array of Storage Size Options

- Storage footprints available ranging from a small countertop units to larger cabinets for bulk storage.

A Wide Range of Configurations to Meet Your Capacity and Workflow Needs

- Combine high security single dose dispensing alongside bulk storage. All medDispense® equipment can be integrated and is powered by medLogic™.

Highly Configurable Software & Hardware

- With medLogic™, you can easily configure user settings and security measures alongside hardware compartment layouts, offering you maximum system flexibility.

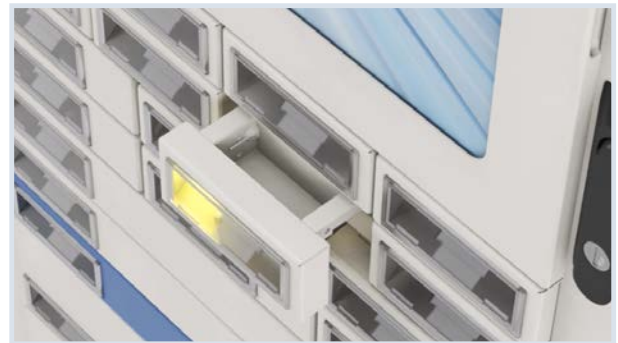

medDispense® hardware configurations

Safe and Secure Dispensing.

Designed to reduce the risk of medication errors and provide secure storage, medDispense® ensures proper safeguards are in place for each item you dispense.

High Security Controlled Substance Storage

- Single dose dispensing with progressive steel drawers (complies with UK ECD regulations).
- Optional witness signature for removal, waste, return or override.
- Discrepancy tracking and notification.
- The medGuard™ controlled substance management module provides system-wide visibility and management of controlled substance inventory with closed loop delivery tracking.

Software Safeguards

- medLogic™ powers all medDispense® cabinets with built-in features such as precounts, patient medication profiles, receipt and label printing and configurable patient and medication searching.
- medGuard™ inventory management software provides closed loop restocking for controlled substances.
- Additional software features:
 - Allergy alerts, duplicate dose alerts, bar code scanning, look-a-like sound alike alerts, tall man lettering.

Credentialed Access and Reporting

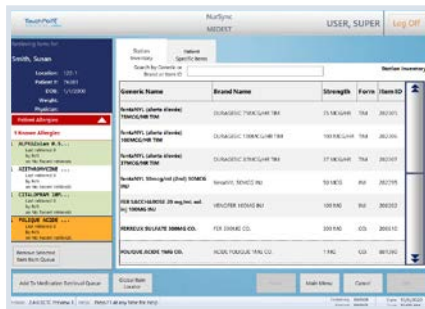

- All medications and supplies stored in a controlled, locked, and credentialed environment.
- The PharmacyCenter™ software module provides visibility to remotely view and control inventory from the pharmacy.
- Control access to specific functions with user level permissions and role-based profiles.

Planning and Support

- Our Professional Services team works closely with you to ensure medication locations and security levels are optimized for your facility processes.
- System interfaces tailored by our Professional Services integrators.
- Flexible technical support and preventive maintenance plans can be tailored to your specific needs.

Workflow Efficiency.

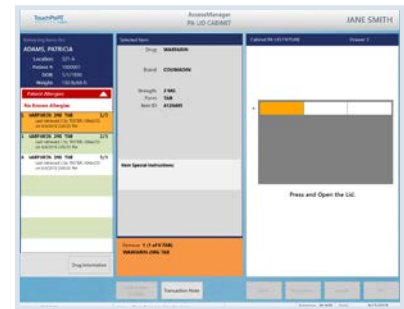

With medLogic™ nurses and pharmacy staff can work smarter, not harder. Software modules such as NurSync™ and PharmacyCenter™ help drive efficiency into your daily workflow.

NurSync™ create a queue

PharmacyCenter™ station management

medLogic™ item retrieval

Remote Medication Queuing

- Maximize time spent with patients and minimize time spent at the ADC with NurSync™ remote medication queuing right from your AccessRx MD™ cart or networked workstation.

Improved Inventory Level Visibility Across All medDispense® Cabinets

- Quickly and easily manage inventory and reduce stock outs across all medDispense® cabinets in your facility with PharmacyCenter™.

Intuitive User Interface

- Patient demographics, medication profile and formulary managed via custom HL7 interface. Easy to navigate user interface reduces time spent at the ADC.

AccessRx MD™

medLogic™

A continuum of integrated hardware and software that enables secure and efficient medication storage, dispensing and transport.

medLogic™ Benefits.

The medLogic™ software platform delivers increased efficiency and flexibility for your team and a safe environment for your patients.

Efficiency

Support for Multi-item Kits

- Pharmacy can create pre-defined, multi-item kits for specific modalities, procedures or protocols.

Barcode Stocking

- Stock cabinets quickly and efficiently using the optional wireless barcode scanner.
- Eliminate time spent with on screen typing, searching and selecting.

FIFO Stocking Workflow

- medLogic™ items are dispensed first-in, first-out to optimize inventory lifecycle.
- Reduce expired medication expenses.

Tracked Medication Waste

- Track prescribed amount against the amount dispensed. User is reminded to document the unadministered amount.

Safety and security

Supports the UK NHS ECD Register

- Supports required requisition and dispense workflow and transaction logging.
- Inventory balance report.

On-demand Stock Report Generation by Item/Medication.

- One Click Restock Report Generation.

Configurable Medication Search

- Helps reduce dispensing errors with a configurable multi-character medication search.

Lot Number Stocking

- Increase traceability of your medications when you need to know where they are.

Flexibility

Fractional Dose Stocking & Dispensing

- Dispense, return and waste functions support decimal values.
- Reduce waste of medications.

Bulk Item Management

- Flexible charge capture rules for frequently dispensed bulk items.

High Definition and Laptop Display

- Now more flexible display options for PharmacyCenter™ and NurSync™ modules.
- User configurable dispensing modes for progressive drawers.
 - Secure Linear Mode
 - Multi-Mode
 - Single-Line Item

The medLogic™ software is user-friendly and easy to operate – saving time and allowing you to focus on patient care.

The system secures and tracks both medications and supplies, while seamlessly integrating with most hospital information systems.

medLogic™ modules improve workflow efficiency, security and visibility so you can save time and focus on delivering exceptional patient care.

NurSync™

The NurSync™ module enables nurses to reduce time spent at the dispensing cabinet station and increase time spent with patients.

NurSync™ enables nurses to create medication queues to help reduce medication retrieval times, create a more efficient workflow and spend more time with patients.

Easy as 1 - 2 - 3

1 Install the NurSync™ module on a computer assigned to the ADC unit such as your AccessPoint™ workstation.

AccessRx MD™

AccessPoint™

2 Log in to create, manage and delete patient medication queues, along with the ability to document controlled drug waste.

NurSync™ main menu

3 When you are ready, go to the medDispense® cabinet and retrieve items from your saved queue.

Dispense your medications

medGuard™

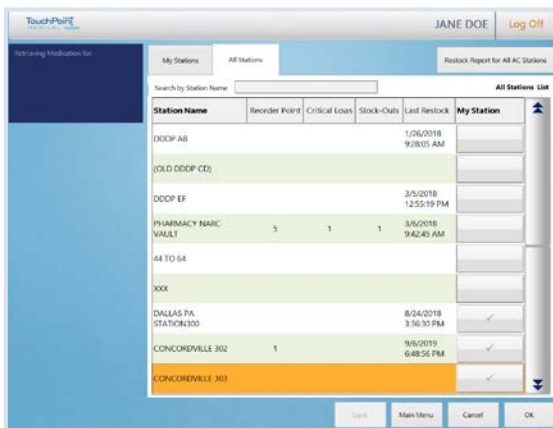

The medGuard™ module enables facilities to store and track controlled substances from a secure, central location.

medGuard™ main menu

Ensure Controlled Substances Reach Their Final Specified medDispense® Cabinet

- Helps close the loop of medication delivery and monitors for potential diversion with controlled restocking access and software safeguards.
- Discrepancy tracking ensures the retrieval quantity recorded in medGuard™ matches the quantity restocked in the medDispense® cabinet.
- Optional end of shift counts with medGuard™ provides additional traceability.

medGuard™ med selection screen

Easily View Controlled Substance Inventory of Your medDispense® Cabinets

- Create controlled substance restock reports for all cabinets.
- Control cabinet visibility by customizing user access.
- Global Item Locator and Global Inventory reports provide you instant access to your facility's controlled substance quantities and locations.
- Clear indicators of supply status at each medDispense® cabinet.

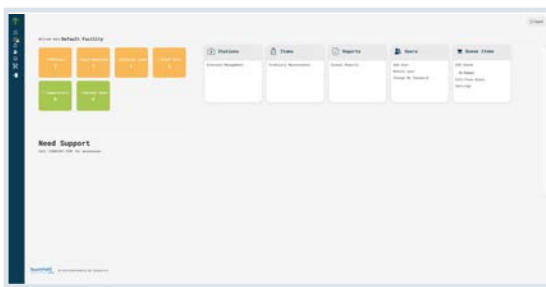

medDispense® V series with clear and steel doors.

Hardware Compatibility:

medGuard™ can be installed on any medDispense® cabinet. medDispense® V series is particularly recommended for its configurable storage compartments.

PharmacyCenter™

The PharmacyCenter™ module gives pharmacy the ability to manage medication across multiple medDispense® cabinets from one easy-to-use dashboard and reporting system.

PharmacyCenter™ main menu

PharmacyCenter™ Advantage

✓ Create reports	✓ Locate critical low items
✓ Configure inventory	✓ Identify out of stock items
✓ View discrepancies	✓ Configure cabinet settings
✓ Operator maintenance	✓ Browser based access

Visibility and Management of Your Inventory Across All Cabinets

- Define specific storage locations for each medication or inventory item.
- Add, delete or modify a medication for the selected cabinet.
- Verify item numbers, descriptions and set drug class.
- Monitor low, out of stock, or expiring medications.
- Manage what medications can be overridden.

Inventory Report

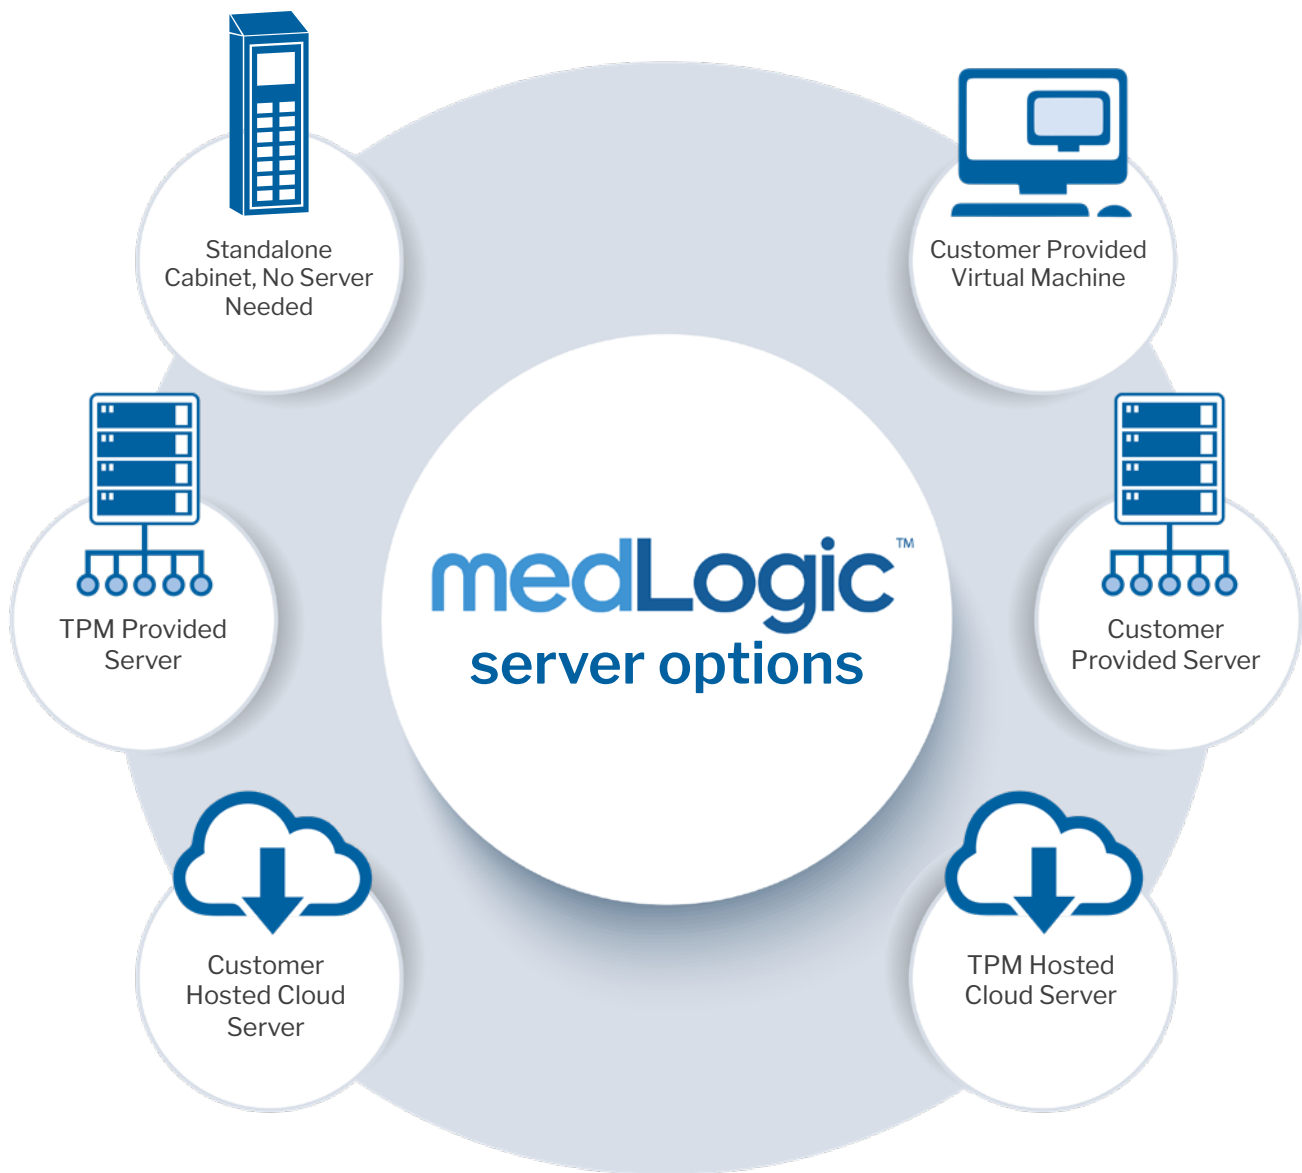

Reporting that Matters

- Report on key metrics that matter to your facility, such as: inventory, top usage, transactions, controlled medications, and more.
- Choose from predefined parameters or customize your own.
- Auto schedule to print or email reports.
- Export report data.
- Ad hoc custom reporting.

Configure Inventory

medLogic™

Flexible Server Options. Whatever the customer needs to host medLogic™ we can accommodate.

Customizable capacity – from configurable linear drawers to high capacity bulk storage.

medDispense® C series

Base 30 with clear doors and drawer system

Bulk Storage in a Smaller Frame

- Bulk storage or large items can be securely stored and dispensed.
- Configurable bins and shelves to fit an array of bulk items.
- Comes with standard overbridge.

Lidded Drawers

- Single wide drawer.
- Three lid sizes (single, double, triple).
- Up to 4 single lids for compact depth cabinet.
- Up to 6 single lids for full depth cabinet.

Linear Drawers

- Single / double wide drawers.
- Up to 7 sections for compact depth cabinet.
- Up to 10 sections for full depth cabinet.

Matrix Drawers

- Available in single, double, and triple depth.
- Up to 56 sections for compact depth cabinet.
- Up to 80 sections for full depth cabinet.

Base 12 counter top unit

The Smallest of the medDispense® Cabinets

- The compact countertop unit fits virtually anywhere.
- Ideal for areas with lower capacity needs.
- 84 maximum unit capacity.

▶ The medDispense® C series integrates with:
F series and V series.

The highest level of security with single dose dispensing to ensure access to only the quantity requested.

medDispense® F series

F series base unit

Highest Security Medication Dispensing

- Single dose steel compartments with up to 12 progressive drawer compartments to ensure access only to the medication requested.
- Steel construction supports the NHS Controlled Substance requirements.

Highly Configurable and Expandable

- Up to 15 different drawer sizes to accommodate the desired security level and item size.
- Supports three dispensing types:
 - Single-dose
 - Single-item
 - Linear/Matrix
 - Multi-mode

Efficient Dispensing Technology

- The pick-to-light technology makes it easier and faster to locate and dispense the selected items.
- Lights guide you to the correct:
 - Cabinet
 - Drawer

The medDispense® F series integrates with:
C series and V series.

Keyboard Storage

- Drawer stores and secures keyboard until ready for use.
- Features a built-in full size keyboard.
- Available on the standard or the countertop.

Access control with user management tools for traceability and more.

medDispense[®]
E series

Access Control

- Badge access eliminates the need for keys.
- User management allows controlled access to cabinets.
- Alerts for doors left open.
- Traceability of cabinet access.
- Wirelessly connected.

Potential Use Cases

- Med rooms.
- Ambulances.
- IT Departments.
- CD cabinets.
- High value storage.

Why TouchPoint Medical E series

- Creates an audit trail for cabinet access by user.
- No keys to lose or share allows nurses to spend more time with patients and less time looking for the keys.
- Software based system that enables auditing, reporting, tracking compliance and more.

System Architecture

System requires TouchPoint Medical provided bluetooth hub.
TouchPoint Medical provided low energy tags/stickers for access.
