medDispense® C series EDU

**Medical and Pharmacy Tech Simulation
Labs can now replicate a “real” hospital
medication delivery system!**

OVERVIEW

The medDispense C series Educational Unit comes standard with 5 rows of drawers. These consist of 6 standard drawers (3.28in) wide, 9 double wide drawers (7.4in) wide, and 1 matrix drawer. Optionally 1 row of double wide drawers can be replaced with premium lidded drawers consisting of 3 single lids, 6 double lids and 3 triple lids. All units come with a bulk storage compartment at the bottom for larger items. Each linear drawer can be configured to hold up to 7 different line items or 1 controlled substance, the same as a typical hospital unit. The C series unit has preloaded simulation software which can also be modified as your needs change.

And with no server or network connection needed, the medDispense® C series EDU is the optimal solution for your simulation lab.
