

Solutions for Rehabilitation Centers

Effortless Compliance

Our automated medication dispensing systems eliminate cumbersome e-kits and ensure medication integrity and compliance. This means less time worrying about logistics and more time spent caring for your patients.

Compact Solutions

Our user friendly cabinets are designed to securely store and dispense medication, built to withstand the rigors of any long term care facility.

Flexible Storage Options

Streamline workflows and access to essential supplies and medications, ensuring seamless patient interactions. Dispensing models like Single Dose and Lidded Pockets support safe, efficient management, optimizing care for rehabilitation teams.

Advanced caregiver workflows that lead to improved patient outcomes in any rehabilitation environment.

TouchPoint Medical creates solutions for rehab centers by streamlining caregiver workflows with secure, automated medication dispensing and storage. Our compact, user friendly cabinets ensure effortless compliance and medication integrity, reducing logistical challenges. With flexible storage options like Single Dose and Lidded Pockets, caregivers can quickly access essential supplies, enhancing efficiency and patient care. Built for the demands of long term care, our solutions support seamless, safe, and effective rehabilitation environments.
