TouchPoint MEDICAL

smartSHIFT™

Caring is hard work. Your cart shouldn't be.

Designed to eliminate friction across every shift—for nurses, IT teams, clinical leadership, and healthcare organizations.

One Cart. Two Shifts.

12.5 hours of runtime with 15 minutes to full charge.

Extended runtime and rapid TurboCharge capability allow the same smartSHIFT™ workstation to support consecutive clinical shifts—reducing the need for battery swaps and dedicated second-shift carts, so caregivers stay focused on patients instead of equipment.

Lower Lifecycle Cost.

Up to 75% reduction in Total Cost of Ownership.

Healthcare leaders are under constant pressure to do more with limited resources. smartSHIFT™ reduces cart count, spare battery inventory, and replacement events—with a five-year refit strategy and 10-Year Uptime Assurance that support smarter capital planning.

Future-Proof Power.

A 1000W AC inverter built for today's IT—and tomorrow's.

A high-capacity 1000W AC inverter gives healthcare organizations the flexibility to support today's clinical computing equipment while providing power headroom for future IT platforms and peripherals.

Caregiver-Centric Design.

Female-centric ergonomics and caregiver-first innovations.

Technology should adapt to caregivers—not the other way around. Ergonomics, mobility, access, and bedside interaction are designed around real-world caregiver workflows to help reduce physical strain throughout every shift.

How smartSHIFT™ Delivers Value Across the Healthcare Enterprise.

Shift Ready. Every Shift.

smartSHIFT™ helps caregivers start each shift with confidence. The Shift Ready workflow optimization interface brings essential cart, power, and readiness information together in one clear experience—reducing setup friction and helping keep technology ready for care.

- Shift Ready workflow optimization UI
- At-a-glance battery runtime and charge status
- System readiness, power-state, and alert visibility
- Personalizable interface designed to reduce shift-start friction

Lower Cost. Longer Uptime.

smartSHIFT™ is designed to lower lifecycle cost while keeping clinical capacity available. Fewer carts, fewer battery replacement events, and a planned refit strategy are reinforced by the 10-Year Uptime Assurance program.

- Up to 75% lower Total Cost of Ownership
- One-cart / two-shift model reduces secondary cart and spare battery demand
- Five-year refit strategy extends useful platform life
- 10-Year Uptime Assurance with backup-cart support to help maintain continuity during covered service events

Future-Proof Power + Battery Intelligence

Clinical computing keeps evolving. smartSHIFT™ combines high-capacity AC power with intelligent battery visibility to support today's equipment while providing headroom and insight for future clinical IT.

- 1000W AC inverter for clinical computing and peripherals
- Advanced battery telemetry with real-time state-of-charge and runtime visibility
- Power-state and charging-status visibility at the cart
- Flexible power architecture designed for current and future IT equipment

Designed Around Caregivers

Technology should adapt to caregivers—not the other way around. smartSHIFT™ combines ergonomic design, comfort, and intuitive controls to reduce friction across long clinical shifts.

- Female-centric ergonomic design approach
- Low sitting height and powered height adjustment
- Heated handle for caregiver comfort in cool clinical environments
- Ergonomic keyboard, accessible controls, and intuitive touchscreen interaction

Better Patient Connections

The best technology fades into the background. smartSHIFT™ helps remove physical barriers at the bedside so caregivers can maintain natural communication while keeping clinical information within reach.

- OpenCare™ Fold-Down Monitor supports more natural bedside positioning
- Eye-to-eye patient engagement
- Supports bedside shift reports and shared review of information
- Caregiver-focused mobility and positioning help preserve workflow continuity

Built for Long-Life Clinical Service

smartSHIFT™ is engineered as a long-life clinical technology platform—combining durable battery technology, serviceability, diagnostics, and warranty support to reduce disruption over the product lifecycle.

- $LiFePO_4$ battery technology with 3,000+ cycle life
- Advanced battery telemetry supports proactive power and service decisions
- 5-Year Standard Warranty with 10-Year Uptime Assurance program available
- Designed for serviceability, diagnostics, safety, reliability, and future upgrades

*Up to ~12 hours of runtime after a 15-minute turbo charge at ~20W static load in controlled testing; actual runtime varies with usage.

*Up to ~75% lower 10-year cost per workstation versus a conventional two-cart model, based on smartSHIFT with Gold warranty; actual savings vary.
